Addendum for
"Voice of Global Governance v2:

(C) 2021 Timothy V. Rue

*** References to "STG" lacked the clarification of being a reference to United Nations "SDG – Sustainable Development Goals" but of the thinking being "Sustainable Target Goals" as in get it done and move on to the next thing.

*** Crypto-Measures and Crypto-Votes: The Correct foundation technology term is "Block-Chain Technology" these two are based on.  Note: Currently the technology is improving to be more energy efficient.

*** The term "Artificial Intelligence" should be understood to be an technology industry wide mislabeling and misleading umbrella term.
For clarity see: https://abstractionphysics.net/USPTO-AI-RFC-Response.pdf

Additionally:
There is a need  for the technology industry to correct a long running issue as a matter of diversity: inclusive of all as opposed to tech savvy individuals.
See: https://abstractionphysics.net/Anti-trust-FTC.pdf
